

**Official Statement regarding the conflict in Israel and Palestine
and repercussion within the micronational community**

The ongoing conflict in the regions of Israel and Palestine deeply concerns us, and we wish to express our commitment to the pursuit of a peaceful resolution through diplomacy.

The path to a sustainable solution lies in open dialogue and peaceful negotiations, and we call upon all parties involved to engage in meaningful diplomacy as the primary means of addressing their differences.

We strongly condemn any attempts by micronational projects to exploit this situation for the purpose of promoting crude agendas and expressing unacceptable prejudices. Such actions only exacerbate tensions and hinder the prospects for lasting peace or micronational development.

We would like to underscore the values of freedom and justice that Józef Bem tirelessly fought for throughout his life and which the nations of the BEM Group hold dear. It is essential that these values guide our actions and that we work together to promote peace, understanding, and a just resolution to this or any other conflict.

In these trying times, let us stand together in the pursuit of diplomacy, peace, and the noble principles of liberty and justice that bind us as a community.
